

Motorized Zoom Lens Controller

(Product ID: LC-1S)

The Motorized Zoom Lens Controller (LC-1S) is a compact controller for motorized zoom lenses. The LC-1S can operate lenses with up to three motors with or without potentiometers as well as auto-iris lenses with either DC or Video iris. The Ethernet connection makes communication much simpler than traditional serial lens controllers and also allows it to be operated over a longer distance than serial devices.

Compatibility	Remotely control motorized zoom lenses with auto-iris (DC and Video type)	Hirose locking connection for lens communication
Control	Auto-detection of attached lens limits	Accurate control of zoom, focus, and iris
Networking	Multiple devices can be connected and simultaneously controlled over a network	10/100 Mbps Ethernet
Versatility	Unlimited programmable preset capability to easily store and recall saved positions on the lens	Easy to use software interface or TCP/IP API commands
