also allows it to be operated over a longer distance than serial devices. Remotely control motorized zoom Hirose locking connection for

Compatibility	lenses (9-12V)	lens communication
Control	Auto-detection of attached lens limits	Accurate control of zoom, focus, and aperture
Networking	Multiple devices can be connected and simultaneously controlled over a network	10/100 Mbps Ethernet
Versatility	Unlimited programmable preset capability to easily store and recall saved positions on the lens	Easy to use software interface or TCP/IP API commands

Uses for this device include Closed-circuit television systems (CCTV), event monitoring, machine vision, and optical based measurements in large test facilities.

CCTV Lens Controller (Product ID: LC-1)

The CCTV Lens Controller (LC-1) is a control device for motorized zoom lenses. The LC-1 can operate lenses with up to three motors with or without potentiometers. The Ethernet connection makes communication much simpler than traditional serial lens controllers and
