Schlieren LED Light Source

LMS-XXX

The LMS-XXX is a 2-inch, air-cooled LED light source used for schlieren and shadowgraph applications. The LMS-XXX can operate in continuous (DC) or pulsed mode.

The LMS-XXX features a variable width slit to adjust the amount of output light from the module. Power supply and carrying case are included with the LED. The wavelength of the LMS-XXX is user defined and based on available LED wavelengths. XXX denotes wavelength in nanometers.
